

IDEATION PHASE

Empathize & Discover

Project Name: AI BlogNest API

Team ID: SWTID-2026-6999

Date: 20 September 2026

Maximum Marks: 4 Marks

The Empathy Map is used to understand the user's behaviours, needs, thoughts, challenges, and expectations before developing the solution.

User Persona

Primary User: Content Creator / Blog Author

THINK & FEEL	HEAR
• Wants to create high-quality blog content efficiently. • Feels that writing complete articles manually takes considerable time. • Wants assistance with generating ideas, content, summaries, and tags. • Wants secure control over personal blog content. • Wants an easy way to find relevant information and existing articles.	• Readers expect useful and well-structured blog content. • Other content creators discuss the need for faster content creation. • Users expect search systems to provide relevant results quickly. • Editors require better control over content review and publication.
SEE	SAY & DO
• Many blogs require manual content creation and editing. • Large numbers of blog posts can be difficult to organize. • Traditional search often depends on exact keywords. • Different users require different levels of access to blog content.	• Creates and manages blog posts. • Organizes posts using categories and tags. • Reviews and edits drafts before publication. • Searches for existing blog content. • Manually prepares summaries and supporting content. • Uses different tools to manage different blogging activities.

PAIN	GAIN
• Time-consuming manual content creation. • Difficulty preparing summaries and tags. • Difficulty managing multiple blog posts and categories. • Unauthorized access can affect content management. • Traditional keyword search may not find conceptually related content.	• Faster AI-assisted blog creation. • Automatic generation of summaries and tags. • Organized blog management. • Secure role-based access. • Improved keyword and semantic search. • Reduced manual effort in content management.
